**&**

***Allowable Subject Matter***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Mr. Gerald Sekimura on March 6, 2009.

**2. The claims have been amended and canceled as follows:**

Claims 1-11 (canceled).

12. (currently amended) An apparatus for providing comparative information about a plurality of different items, including

a visual display providing a visual image having an interactive navigational frame and a plurality of dynamic frames;

a server communicatively coupled to the visual display and storing information about the plurality of different items, wherein each of the different plurality of items has an associated document that was prepared for the item and that provides information for comparison from that item, and the stored information is in the form of the associated documents;

wherein the server compiles reports in response to a user designation in the navigational frame of the different items to be compared, the reports comprising frames of

information about the designated different items in which each frame corresponds to portions of the information relating to common topics and include identifying tags, and wherein the visual display displays in each of the plurality of dynamic frames, in response to a user designation of an identifying tag, the frames from the reports for the different items designated to be compared corresponding to the designated identifying tag, so that the corresponding frames for the different items are observable at the same time.

Claims 13-15 (canceled).

***Allowable Subject Matter***

3. Claim 12 is allowed.
4. The following is an examiner's statement of reasons for allowance in combination with other claim limitations:

Independent claim 12, when considered as a whole, is allowable over the Prior Art of record. Specifically, the Prior Art of record fails to teach that the apparatus for providing comparative information about the plurality of different items, including the visual display providing the visual image having the interactive navigational frame and the plurality of dynamic frames, the server communicatively coupled to the visual display and storing information about the plurality of different items, wherein each of the different plurality of items has the associated document that was prepared for the item and that provides information for comparison from that item, and the stored information is in the form of the associated documents wherein the server compiles reports in response to the user designation in the navigational frame of the different items to be

compared, the reports comprising frames of information about the designated different items in which each frame corresponds to portions of the information relating to common topics and include identifying tags, and wherein the visual display displays in each of the plurality of dynamic frames, in response to the user designation of the identifying tag, the frames from the reports for the different items designated to be compared corresponding to the designated identifying tag, so that the corresponding frames for the different items are observable at the same time.
